Envelope Pillow Cover — 18 in

Finished size: 18 in × 18 in cover for an 18 × 18 in insert

1 in square

25.4 mm / 1 in

Print at 100% / Actual Size. Disable Fit to page and printer scaling. Measure BOTH squares in both directions before cutting fabric.

Scale check: each side must be 1 in (25.4 mm). Measured: _____ in. If either square is wrong, correct print settings and reprint.

Included: rectangle cutting chart, full–size shaped templates where needed, solid cutting lines, dashed stitching lines, grain / fold marks and assembly steps. Rectangle charts are measurements, not scale drawings.

Seam allowance included: 0.5 in.

Materials

• 1 yard of prewashed woven cotton, at least 42 in usable width; directional prints may need more.

• 18 × 18 in pillow insert; thread, ruler, clips, iron and sewing machine.

Cutting chart and pattern notes

Measure rectangle pieces directly on fabric. Template dimensions describe the paper cutting boundary; seam allowance is already included.

Piece / kind	Cut size (inches)	Quantity / grain
Pillow front (chart)	19 in × 19 in	Cut 1 from main fabric. Height parallel to selvage.
Pillow back panel (chart)	19 in × 12.5 in	Cut 2 from main fabric. Height parallel to selvage.

One size only. Seam allowance is included; do not add it again.

Layout: front and one back fit side by side across 42 in fabric; place the second back in the next row.

All dimensions are inches (in); 1 in = 25.4 mm. No full–size template is needed for these rectangles.

Assembly instructions

1. Cut Pillow front 19 in × 19 in and two Pillow back panel rectangles 19 in × 12.5 in. Measure these rectangles on fabric; the chart is not a full–size rectangle template.

2. On each Pillow back panel, hem one 19 in edge: press 0.5 in to the wrong side, then another 0.5 in. Stitch close to the inner fold. The hem consumes 1 in of panel height.

3. Lay Pillow front right side up. Place both Pillow back panel pieces right side down, matching opposite outer edges. The hemmed edges overlap by 4 in; pin all four sides.

4. Stitch all four sides at 0.5 in seam allowance. Backstitch across each end of the envelope opening; finish the raw seams with zigzag if needed.

5. Clip corner tips without cutting stitches. Turn through the back opening, press and insert the pillow. Remove the insert before washing.
